Updated Covid-19 Guidelines, WCCC, Adult Technical Training

WCCC Adult Technical Training Students, Instructors, and Office Staff,

The CDC recently revised Covid-19 recommendations and the below will act as new WCCC, Adult Technical Training guidelines regarding the three categories previously identified as either infected or exposed. This document will replace the former guidelines dated 5/21/2020.

There are three categories of exposure in which WCCC considers Covid-19 protocol – Sept., 2020 update:

1. An individual diagnosed with Covid-19 either by a positive test result or by the diagnosis of a healthcare provider.

WCCC considers these individuals as “positives” and that individual must isolate away from WCCC campus a minimum of 14 days. These ‘positive’ individuals will not be permitted to return to campus until all of the following have been met.

- a. At least 14 days have passed since the positive test or the provider diagnosis. A copy of the test or provider diagnosis must be received by WCCC to establish the 14 day count.
- b. At least 3 days (72 hours) have passed since recovery defined as resolution of fever without the use of fever-reduction medications and improvement in respiratory symptoms

*All Covid-19 test results or diagnoses should be submitted via PDF email attachment to thuffman@thecareercenter.net

*Communication regarding permission to return to campus: Tony Huffman (740) 373-2766 x 2010

2. Contact of a positive: definition – an individual who is exposed to another individual who has been found to be positive for Covid-19. ‘Exposed to’ means either one or both parties being unmasked and being less than 6 feet from another individual for 10 minutes or more who has been found to be positive for Covid-19. In this case, the following would pertain:
 - a. Minimum 14 day quarantine from campus for the ‘exposed’ individual counting from the last date of exposure to the positive individual.
 - b. Exposed individual is symptom free and fever free for at least 24 hours prior to returning to campus.

3. Contact of a contact: definition – an individual who is exposed (one or both parties unmasked and less than six feet apart for 10 minutes or more) to a ‘contact of a positive.’ These individuals will not be quarantined away from campus at the request of WCCC. However, they should self-monitor for symptoms and report to WCCC staff immediately if any symptoms develop.

Please reach out to me with questions or concerns.

Thank you, everyone, for your willingness to help us through these times.

Tony Huffman, Ed.D., Director, Adult Technical Training
